- **Finished food products (organic) made with or from hemp**
- **Textiles**
- **Bags**
- **Cosmetics**

## Company Profile

Hempro International GmbH & Co. KG is a producer and wholesaler for the whole range of raw materials and end products made of hemp: hemp textiles, hemp accessories, hemp cosmetics and hemp food. With the consistent implementation of a strategy focused on product quality, Hempro International has succeeded in becoming one of Europe's leading companies for hemp products.

The main area of Hempro Int.'s business is the development and production of hemp food products, in which the company has proved itself to be a reliable partner and supplier for the processing food-industry for conventional and also controlled organic quality. Well-known producers of food and bakery products as well as leading wholesalers regularly make bulk purchases of raw materials such as hemp seeds, husked hemp seeds, cold-pressed hempseed oil, refined hempseed oil, hemp flour, hemp protein powder and hemp dietary fibre.

Managing Director Daniel Kruse has decades of experience in the hemp market. Having worked for many years at the pioneer-company HanfHaus GmbH (Berlin), he founded Hempro International in 2002. His successful company philosophy is to be a reliable partner for industry and consumers, guarantee the best product quality available on the market and successfully combine ecology and economy. Since it was founded, Hempro Int. has counted renowned companies among its regular customers. Hempro Int. is a regular member of the European Industrial Hemp Association (EIHA) and a member of the Canadian Hemp Trade Alliance (CHTA).

The company's successful own brand HANF FARM also exemplifies Hempro Int.'s high quality standard. With HANF FARM the Duesseldorf-based company succeeded in bringing onto the market an extensive range of food products made from all the valuable raw materials that the hemp plant has to offer. Hempro Int. also devises product developments and recipes for numerous private-label customers and carries out contract production for them.

## Hemp Protein Powder 70

The tendency towards healthy nutrition and a conscious lifestyle as well as a growing number of vegetarians and vegans call for alternative protein sources.

Following this trend, Hempro International has just brought its new Hemp Protein Powder 70 on the market. It is an outstanding alternative to artificial protein powders due to its natural source of essential ingredients such as omegas and iron. Its light nutty taste makes it a delicious supplement to smoothies, bread and pastries or mueslis. It can also be applied in food procession, e.g. for increasing the protein content in meat products or as an addition to health products. Hemp Protein Powder 70 is gluten-free and antiallergenic.

## What you should know about hemp

Hemp is one of the oldest cultivated plants in the world and has an immeasurable value for people and nature. Hemp is more versatile than virtually any other plant on earth. Hemp supplies the raw material for clothes, food, cosmetics, building materials and energy. Owing to its extreme resilience, the hemp plant does not require pesticides to grow. Easy to grow in an environmentally friendly way, quick to regrow, and extremely resistant, hemp makes an important contribution to the maintenance of ecological balance.

From a nutritional-physiological perspective, products made from or with hemp are immensely valuable. Given that hemp is rich in polyunsaturated fats and, above all, contains the perfect ratio of omega 6 to omega 3 (3:1) as well as all eight essential amino acids, hemp foods can make a valuable contribution to daily nutrition.
